

COST ESTIMATE

Estimate II: Removal of all asbestos-containing materials in Priority Level I and replacement with nonasbestos-containing materials.

Total Removal/Replacement	\$800
10% Contingency	\$80
Total Removal/Replacement with Contingency	\$880

The total construction cost for materials in this priority level was too low to justify applying minimum architectural/engineering design, air monitoring, and reimbursable fees; therefore, these costs were not included. These fees will have to be independently negotiated.
